

LIST OF IMPACTS AND MANAGEMENT PLANS BY ABIOTIC ENVIRONMENT

No.	ENVIRONMENTAL MANAGEMENT PLAN	No.	IMPACT
1	Program for the management of conservation and restoration of the geotechnical stability	1	Changes in the physical and chemical properties of the soil
		2	Modification of the landscape
2	Program for the management of liquid waste - Establishment of the ecological flow	3	Alteration of the river dynamics
		4	Changes in water quality
		5	Decrease in the water availability
3	Program for handling and disposal of materials	6	Increasing the concentration of particulate matter and gases
		1	Changes in the physical and chemical properties of the soil
		2	Modification of the landscape
4	Program of sources of particulate matter, gases and noise emissions	7	Increase in sound pressure levels
		8	Empowerment of conflicts
		9	Generation of expectations
		6	Increasing the concentration of particulate matter and gases
5	Program of liquid waste management	1	Changes in the physical and chemical properties of the soil
		3	Alteration of the river dynamics
		4	Changes in water quality
		5	Decrease in the water availability
6	Program for the management of solid waste, hazardous household and industrial	1	Changes in the physical and chemical properties of the soil
		2	Modification of the landscape
		4	Changes in water quality
		5	Decrease in the water availability
		6	Increasing the concentration of particulate matter and gases
		8	Generation of expectations
7	Program for the management of traffic	6	Increasing the concentration of particulate matter and gases
		7	Increase in sound pressure levels
		8	Empowerment of conflicts
		9	Generation of expectations
