ECOSAMBITO C.LTDA.

December, 2020

INFORMATION QUERY AND DISCLOSURE

As part of the Environmental Permits for Projects considered to be of medium and high impact, national environmental regulations require that the content of the Environmental Impact Study and the Environmental Management Plan be submitted for consideration by the general public, and that different outlets be used for the social stakeholders and the general public to learn about results thereof first hand. For this purpose, the study is published digitally and physically at an information desk, and the most important point of this process is the Public Assembly or Informational Meeting where the Bidder gives a presentation to the social stakeholders regarding the characteristics of the project, the identified impacts, and the Environmental Management Plan, and also receives suggestions or comments from them.

YILPORTECU has carried out two Social Participation Processes (PPS) as part of its Environmental Permits:

1. THE PPS OF THE “ENVIRONMENTAL IMPACT STUDY FOR THE CONSTRUCTION AND OPERATION OF THE PUERTO BOLÍVAR PORT TERMINAL OPERATED BY YILPORT TERMINAL OPERATIONS YILPORTECU S.A.,” held in October 2017.
2. THE PPS OF THE “ENVIRONMENTAL IMPACT STUDY AND ENVIRONMENTAL MANAGEMENT PLAN FOR THE DREDGING OF PIERS 1, 2, 3, 4, 5, AND 6, THE MANEUVERING AREA, AND THE ACCESS CANAL OF PUERTO BOLIVAR,” held in June 2017.

The reports of these processes can be found in the Annexes attached to this report.
